

## STALLBOY FEED – AUTOMATIC FEED PUSHER

The Stallboy Feed Automatic Feedpusher is the innovative solution that ensures fresh feed is available around the clock. Because the Stallboy Feed constantly pushes fresh feed in the alley, the cows eat more feed – and more frequently – therefore increasing their milk volume output.

The fresh-feed software automatically routes the Stallboy about 2 inches nearer to the feed boxes every 2 hours, keeping fresh feed always within reach and lower ranging cows also get fresh feed.

The Stallboy Feed is equipped with an individually driven drum for powerful and steady motion. This continuous feed-pushing action also reduces the need to warm the feed. All Stallboy Feed Automatic Feed Pushers can easily be fitted with an optional Concentrate Feedbox on top of the unit, where small amounts of concentrates, minerals or other types of enticement feed are dosed over the basic feed mixture.

## STALLBOY 400 – FEED PUSHER

The compact Stallboy 400 Automatic Feed Pusher, an economical entry-level feed pusher, is specially engineered for medium-sized and smaller feed alleys. While smaller, the Stallboy 400 still features many of the time-proven core functions of the Stallboy Feed, including the intelligently designed fresh-feed software.
